“Crptocurrency” : Subversion or Selection?

The pain point of the real economy

- 1.Process is too complicated
2. Lack of authenticity and reliability for big data

The pain point of the traditional financial industry

- 1.High Cost
- 2.Low Inclusive

“Crptocurrency” : Subversion or Selection?

1. Digital assets desn't only mean cryptocureency (Token).

- a) Digital Assets have extensively wider scope than that of Token.
- b) While, Token has its unique functions.
- c) Especially, token connects the real and virtual economy.

“Crptocurrency” : Subversion or Selection?

2. The function of Token combines currency with stock, which works as equity.

- a) As to currency, Token offerrs liquidity and international settlement.
- b) As an intermediary, Token works for both Primary Market and Seconday Market simultaneously, which serves the real economy.
- c) As to its application, Token affluxes a new blood in both the real and virtual economy.

“Crptocurrency” : Subversion or Selection?

3. Token doesn't subverse the traditional finance and the real economy.

a)The “Token” concept doesn’ t mean inventing a new financial system.

b)Token serves the real economy, which will eventually choose Token. This is an exciting way to solve the existing problem in the real economy.

c)As an evolution of bottom technology, “Chainplus” should appeal the reformation of the currency, and also the monetary system.

d)Linkeychain is a leading provider of Token solution in China, which improves the real economy.

THANK YOU!
